CLASS OF 2022

Life Beyond Century Avenue
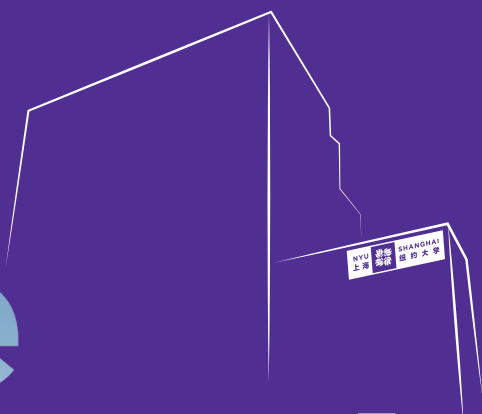

NYU 上海 SHANGHAI 纽约大学

Over the past few years, we've been coping with unforeseen challenges brought on by the global pandemic, climate change, environmental pollution, and economic flux. Especially in these changing times, the world needs cross-cultural and global-minded talents who understand and value different perspectives and can collaborate across borders.

We're glad to see our Class of 2022 graduates have chosen to contribute to the betterment of society and are working towards a shared future vision for humanity.

The 2022 Life Beyond Century Avenue report finds 365 graduates from 34 countries and regions embarking upon a diverse array of post-graduation career paths in 25 countries and regions - from academic research to finance and software development, to volunteering in underdeveloped communities.

As NYU Shanghai celebrates its 10th anniversary, we are extremely proud of our graduates' exciting achievements. We wish them progress in their future careers and continued studies. Come back to see us at our New Bund Campus!

*This report includes NYU Shanghai graduates from January 1, 2022 through December 31, 2022. Figures in this report are based on the 85% of graduates for whom the University has verifiable information about their post-graduation activities, including information gathered from survey responses as well as external sources.
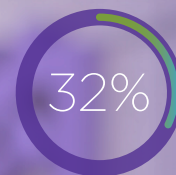

*Statistics are rounded to the nearest whole number. Therefore, totals do not always equal 100%.

GLOBAL AWARDS

5
prestigious global scholarships and fellowships

🏆🏆🏆 3 Erasmus Mundus Scholars
🏆 1 Schwarzman Scholar
🏆 1 Yenching Scholar

Hometown: Seattle, USA
Major: Social Science (Political Science concentration)
Minors: Chinese Language, Linguistics
First Destination: Erasmus Mundus International Master's Program in Central and Eastern European, Russian, Eurasian Studies

"
I really benefited from the tight-knit community at NYU Shanghai, especially when it came to building relationships with professors and other mentors. The experience I got in the Humanities Research Lab over the past two summers was very beneficial to my Erasmus Mundus application, as I was able to show my readiness to conduct graduate-level research.
"

Jaime Cantwell
Erasmus Mundus Scholar

Hometown: New York, USA
Major: Global China Studies and Social Science
First Destination: Yenching Scholars Program in China Studies, Peking University

"
NYU Shanghai has been the perfect environment to learn Chinese while maintaining a strong connection with my American values.
"

Kathy Song Kaixin
Yenching Scholar

Hometown: Chongqing, China
Major: Social Science and Economics
First Destination: Schwarzman Scholars Program in Global Affairs, Tsinghua University

"
My research skills have grown a lot through the Deans' Undergraduate Research Fund, Independent Study Course, and capstone program. My research around Belt and Road Initiatives, China's diplomacy, and Southeast Asia have really pointed me in a direction that I want to explore in my graduate study and my future career. Although I have never taken a course specifically on international relations theory or China's foreign relations, my own research has afforded me a solid understanding on some related issues. Here at Schwarzman, I've gotten the chance to share many of my previous findings with my colleagues through dialogue and presentations.
"

Xu Jingzhi
Schwarzman Scholar

Hometown: Chongqing, China
Major: Data Science
First Destination: Big Data Management and Analytics, Erasmus Mundus Joint Master's Program

"
During the summer of 2020, I worked as a Research Assistant in Professor Heather Lee's Humanities Lab. This was the first time I had the chance to apply what I learned from my major to practical research. This experience not only helped me with my graduate school and scholarship applications, but also gave me insight into many data-related course projects that I am doing now.

My experience at NYU Shanghai and study away experience in New York have further enabled me to show respect and empathy, actively listen and communicate, and share in a non-violent way while discussing multicultural and personal narratives from different personal backgrounds.
"

Xu You
Erasmus Mundus Scholar

China Studies (Yenching Scholars Program)

Hometown: New York, USA
Major: Interactive Media and Business (IMB)
First Destination: IBM

"I'm glad I studied away in New York to take more business classes. They were mostly management courses where we learned about strategy and innovation, and they made me fall in love with entrepreneurship and design. I want to be able to create innovative solutions and tackle complex problems. Reading case studies made me want to go try some of these things on my own and then make my own mark."

Sebastian Hephaestus Lau

Hometown: New York City, USA
Major: Business and Marketing
First Destination: Run the Chain

"While at NYU Shanghai, I've explored my interests, whether through conducting research with professors or taking part in internship opportunities. The opportunity for exploration and networking helped me find what I am genuinely passionate about. Connecting with people in countries and cities I've never been to has been an enriching experience. I learned not only about their cultures but also was able to grow and discover alongside them."

Mathew So

Hometown: Singapore
Major: Social Science (Political Economy track)
First Destination: Bytedance

"Coming to NYU Shanghai, I realized I had a voice, and that helped me to find my own individuality. The exposure to global experiences has been important to me. I've become more cognizant of different cultures, and it made me more open to new experiences. Student programs like LEAD and the Reality Show emphasize the importance of intersectionality and taught me to be more empathetic towards different perspectives."

Samuel Ong Chao Zheng

Hometown: Exton, USA
Major: Interactive Media Arts (IMA)
Minor: Business
First Destination: MS in Marketing and Retail Science at NYU Shanghai

"As an IMA major at NYU Shanghai, I learned about a lot of topics, including 3D design, visual design, design thinking, programming, microcontrollers, and prototyping. I think having knowledge of these topics is essential for a marketer to be able to implement marketing theories. Without these skills, all I would know is theory and would have no way to test them, but with an IMA background alongside my business minor, my studies allowed me to touch upon all the skills needed to be an efficient marketer."

Cyrus Guo Yang
