----------------------	------------------	--------------------------	--------------------------

Spring Semester: Shanghai

China Business Studies	Non-finance Elective	Core or General Elective	Core or General Elective
------------------------	----------------------	--------------------------	--------------------------

Considerations:

- Before studying away, students should complete *Microeconomics, Principles of Macroeconomics, Intermediate Microeconomics, Intermediate Macroeconomics, Multivariable Calculus, Probability and Statistic* or *Statistics for Business and Economics*. Students who wish to study in New York ideally complete *Econometrics*.
- Students planning to study away for two semesters are strongly encouraged to spend the first semester in a location other than New York. Applicants who spend the first semester away in another location will receive priority consideration for New York in their second semester away.
- Students who elect to spend spring of their junior year in New York (versus fall of the junior year) will have more earned credit points, which will enable them to have an earlier registration time and have a better chance of enrolling in high-demand courses.
- It is possible to study away at a global location and take no courses that count towards the major while staying on track for graduation.
- Students who wish to spend two semesters in New York will need to submit a proposal for the second semester demonstrating a compelling academic rationale.
- The following Pathways through NYU's Global Network are suggested:
 - Students interested in Development Economics should plan to study in Accra first followed by a semester in New York or Abu Dhabi.
 - Students interested in financial technology should plan to study in Tel Aviv first followed by a semester in New York.
 - London, Florence, New York and Abu Dhabi offer courses required for the Economics major. Students may study in these sites in either semester.
 - Students who wish to be part of the Washington DC Leadership Program ideally plan to apply for junior fall.
- Students who plan to study in New York, should consider following:
 - Students should anticipate registering for courses at the College of Arts and Science (CAS) and the Stern School of Business.
 - Students may begin registering for approved CAS Economics courses the first week of registration when their assigned registration window opens.
 - Upper-level Stern courses open to non-Stern students after the first five days of registration.
 - Students who completed all required courses for the Economics major with a GPA of 3.64 or higher may be eligible for ONE graduate-level course. Registration will require permission of the NYUSH Economics area head and the Director of Undergraduate Studies of the NYUNY Economics department.
 - Stern graduate courses are not available to undergraduate students.
 - Students may not audit Stern courses.
 - Each semester, there are many courses taught in New York that often close to students who are not matriculated majors in the course's sponsoring department;

this means they often fill with matriculated NY majors before the majority of students, including students from NYUAD and NYUSH, register for courses. However, a number of these courses are also offered at other global locations, where they are generally open to all students.

- o NYU New York maintains a [campus-wide list](#) covering these courses, along with alternative locations, for the benefit of NYUAD and NYUSH students. All students should consult this list before selecting a study away location and should not include any listed course in their study plans for a semester away in New York.
