All members of the NYU Shanghai community are required to enter the building through the Songlin Road (north lobby) entries, where they will first undergo body temperature measuring screening. Any person whose body temperature measures higher than 37.5 degrees Celsius will be registered and transferred for further treatment. If a person's body temperature is normal, they will be allowed to enter via NYUCard or facial recognition.

Generally external visitors are not allowed to enter the building. If there are any special cases, please contact Public Safety.

- **Food Delivery/Take-away**

Building security and reception will not accept take away orders. Community members shall go outside the building to pick up their own orders.

- **Vehicle Access**

NYU Shanghai community members who drive to campus are required to enter through the Songlin Road entrance after going through the body temperature measuring station operated by security officers. Any persons with a body temperature higher than 37.5 degrees Celsius will be transferred for further treatment.

External vehicles are not allowed to enter into the campus. If there are any special cases, please contact Public Safety.

- **Vehicles for Delivery**

Delivery personnel will be required to go through the body temperature measuring station operated by the security officers at the Songlin Road entrance.
