

## Postdoctoral Teaching Fellowship in Psychology

New York University Shanghai invites applications for a Postdoctoral Teaching Fellowship in either the 2021-2022 Academic Year or the 2022 Calendar Year. This is a residential fellowship for an entire academic or calendar year and entails one semester of teaching and one semester dedicated to the fellow's own scholarly work.

During the teaching semester, Fellows will teach the lab component of **Introduction to Psychology**, a popular course usually taken by first or second year undergraduates at NYU Shanghai. The lab component fulfills the University's Experimental Discovery Core Curriculum requirement and aims to provide an understanding of the experimental methodologies used to investigate psychological phenomena (e.g., cognition and behavior). The Experimental Discovery component is designed to provide hands-on experience in experimental research for students who formulate and examine research questions, design and execute experiments, collect data, collect and clean data sets, run basic statistical analyses, and draft summary reports.

Teaching responsibilities include the following:

- Preparing course materials
- Helping students understand the texts covered in the course
- Preparing for the weekly lab sessions to maximize discussion and participation
- Grading assignments and examinations
- Assessing overall student progress
- Giving lectures in the Introduction to Psychology course related to the lab component
- Holding office hours for student consultations
- Participating in meetings to discuss administrative and/or pedagogical matters related to the course

The non-teaching semester is devoted to the Fellow's own research. Each Fellow will be paired with a mentor amongst the Psychology faculty at NYU Shanghai. Possible synergies with the fellow's and the professor's research agendas are desirable. Additionally, Fellows are expected to engage with the larger intellectual life of NYU Shanghai, participating in, or possibly organizing, academic events of interest to the University community, or otherwise contributing to the intellectual mission of the University. Fellows are expected to remain in residence for the full academic or calendar year, but will have a research fund for travel to conferences or research sites.

### Required Qualifications

PhD conferred no later than summer 2021 and no earlier than 2019 in any field of psychology. Competence in experimental design and analysis required.

### Preferred Qualifications

- Experimental experience, strongly preferred

- Prior teaching assistant or lab instruction experience, preferred
- Previous teaching experience, preferred
- Experience teaching non-native speakers of English, preferred

### **Application Instructions**

Candidates must submit applications via Interfolio at: <http://apply.interfolio.com/81041>.

Application materials **MUST** be divided into two sections (applications not following this guideline will not be considered):

**Anonymous Materials** (these materials should not include information concerning the person's name or identity in any way, nor should they include the name of previous institutions where the person has studied or worked):

- Cover Letter
- CV (make sure to anonymize the publication list, i.e. only include article/manuscript titles)
- The most important/representative article or article manuscript to which the applicant has made important contributions (all author and institution names should be removed)
- 2-page research plan identifying synergies with current NYU Shanghai psychology faculty

### **Non-anonymous Materials:**

- At least two letters of reference that address the applicant's intellectual and pedagogical strengths
- Copy of all graduate-level transcripts

Applications will be received until **January 15, 2021**.

---

NYU Shanghai is the third degree-granting campus within New York University's global network. It is the first higher education joint venture in China authorized to grant degrees that are accredited in the U.S. as well as in China. All teaching is conducted in English. A research university with liberal arts and science at its core, it resides in one of the world's great cities with a vibrant intellectual community. NYU Shanghai recruits scholars of the highest caliber who are committed to NYU's global vision of transformative teaching and innovative research and who embody the global society in which we live.

NYU's global network includes degree-granting campuses in New York, Shanghai, and Abu Dhabi, complemented by eleven additional academic centers across five continents. Faculty and students circulate within the network in pursuit of common research interests and cross-cultural, interdisciplinary endeavors, both local and global.

NYU Shanghai is an equal opportunity employer committed to equity, diversity, and social inclusion. We strongly encourage applications from under-represented individuals in the profession, across color, creed, race, ethnic and national origin, physical ability, and gender and sexual identity. NYU Shanghai affirms the value of differing perspectives on the world as we strive to build the strongest possible university with the widest reach.
