Considerations:

- Most Physics students will consider Abu Dhabi and/or New York for study away due to the course offerings
- Students who wish to be part of the Washington DC Leadership Program ideally apply for junior fall.
- Students who wish to spend two semesters in New York will need to submit a proposal for the second semester demonstrating a compelling academic rationale.
- Students who plan to study in New York, should consider the following:
 - Students should anticipate registering for courses at the College of Arts and Science (CAS) and the Stern School of Business, among other schools.
 - Upper-level Stern courses open to non-Stern students after the first five days of registration.
 - Stern graduate courses are not available to undergraduate students.
 - Students are not permitted to audit Stern courses.
 - Each semester, there are many courses taught in New York that often close to students who are not matriculated majors in the course’s sponsoring department; this means they often fill with matriculated NY majors before the majority of students, including students from NYUAD and NYUSH, register. However, a number of these courses are also offered at other global locations, where they are generally open to all students.
 - NYU New York maintains a [campus-wide list](#) covering these courses, along with alternative locations, for the benefit of NYUAD and NYUSH students. All students should consult this list before selecting a study away location and should not include any listed course in their study plans for a semester away in New York.
